

## Oxytetracycline

---

CAS#: 6153-64-6

### Where is this allergen found?

---

Oxytetracycline is an antibiotic used to treat bacterial infections such as respiratory, urinary tracts, skin, ear, eye, Gonorrhea, Chlamydia, and acne. It is also used to treat Lyme disease, Typhus, and relapsing fever.

### How can you avoid contact with this allergen?

---

Avoid products that list any of the following names in the ingredients:

- 2-Naphthacencarboxamide, 4-(dimethylamino)-1,4,4a,5,5a,6,11,12a-octahydro-3,5,6,10,12,12a-hexahydroxy-6-methyl-1,11-dioxo-, (4S-(4alpha,4aalpha,5alpha,5aalpha,6beta,12alpha))-, dehydrate
- 4-(Dimethylamino)-1,4,4a,5,5a,6,11,12a-octahydro-3,5,6,10,12,12a-hexahydroxy-6-methyl-1,11-dioxo-2-naphthacencarboxamide dehydrate
- CCRIS 9079
- Hydroxytetryklindihydrat
- OXTC
- Oxytetracyclini dihydras
- Oxytetracyclinium dihydricum
- Terramycin

### What are some products that may contain this allergen?

---

Prescription Medications

- Acne
- Breathing difficulties
- Ear
- Eye
- STDs

For additional information about products that might contain this allergen, visit the Consumer Product Information Database ([householdproducts.nlm.nih.gov](http://householdproducts.nlm.nih.gov)) online at the United States National Library of Medicine. These lists are

brief and provide just a few examples. They are not comprehensive. Product formulations also change frequently. Read product labels carefully and talk to your doctor if you have any questions. These are general guidelines. Talk to your doctor for more specific instructions.
