

the art and science of smart patch testing™

## PG323: diethylenetriamine

**CAS#: 111-40-0**

### Patient Information

Your patch test result indicates that you have a contact allergy to diethylenetriamine. This contact allergy may cause your skin to react when it is exposed to this substance although it may take several days for the symptoms to appear. Typical symptoms include redness, swelling, itching, and fluid-filled blisters.

### Where is diethylenetriamine found?

This substance is used in applications such as fabric softeners, lube oil and fuel additives, and textile additives.

### How can you avoid contact with diethylenetriamine?

Avoid products that list any of the following names in the ingredients:

- 1,2-Ethanediamine, N-(2-aminoethyl)-
- 1,4,7-Triazaheptane
- 1,5-Diamino-3-azapentane
- 2,2'-Diaminodiethylamine
- 2,2'-Iminobis(ethanamine)
- 2-(2-Aminoethylamino)ethylamine
- 3-Azapentane-1,5-diamine
- 4-04-00-01238 (Beilstein Handbook Reference)
- Aminoethylethandiamine
- Ancamine DETA
- BRN 0605314
- Barsamide 115
- Bis(2-aminoethyl)amine
- Bis(beta-aminoethyl)amine
- CCRIS 4794
- ChS-P 1
- DEH 20
- Diethylamine, 2,2'-diamino-
- Diethylenetriamine
- EINECS 203-865-4
- Epicure T
- Epon 3223
- Ethylamine, 2,2'-iminobis-
- H 9506
- HSDB 525
- Imino-bis-ethylamine
- N,N-Bis(2-aminoethyl)amine
- N-(2-Aminoethyl)-1,2-ethanediamine
- NSC 446

### What are some products that may contain diethylenetriamine?

[Automotive products](#)

[Household products](#)

\*For additional information about products that might contain **diethylenetriamine**, go to the Household Product Database online (<http://householdproducts.nlm.nih.gov>) at the United States National Library of Medicine. These lists are brief and provide just a few examples. They are not comprehensive. Product formulations also change frequently. Read product labels carefully and talk to your doctor if you have any questions. These are general guidelines. Talk to your doctor for more specific instructions.
