

the art and science of smart patch testing™

## CS490: Amcinonide CAS#: 51022-69-6

### Patient Information

Your patch test result indicates that you have a contact allergy to amcinonide. This contact allergy may cause your skin to react when it is exposed to this substance although it may take several days for the symptoms to appear. Typical symptoms include redness, swelling, itching, and fluid-filled blisters.

#### Where is amcinonide found?

Amcinonide is found in medications used to treat inflammation and itching of the skin. It reduces swelling, itching, and redness.

#### How can you avoid contact with amcinonide?

Avoid products that list any of the following names in the ingredients:

- 19alpha-Fluor-11beta,21-dihydroxy-16alpha,17alpha-(tetramethylen)methylendioxy-1,4-pregnadien-3,20-dion 21-acetat
- 9-Fluoro-11beta,16alpha,17,21-tetrahydroxypregna-1,4-diene-3,20-dione cyclic 16,17-acetal with cyclopentanone, 21-acetate
- Amcinonide
- Amcinonido
- Amcinonido [INN-Spanish]
- Amcinonidum
- Amcinonidum [INN-Latin]
- CL 34699
- CL-34699
- Cyclocort
- EINECS 256-915-2
- Pregna-1,4-diene-3,20-dione, 21-(acetyloxy)-16,17-(cyclopentylidenebis(oxy))-9-fluoro-11-hydroxy-, (11beta,16alpha)-
- Triamcinolonacetatcyclopentanonid
- Visderm

#### What are some products that may contain amcinonide?

##### Topical Medications:

- Creams
- Ointments

\*For additional information about products that might contain **amcinonide**, go to the Household Product Database online (<http://householdproducts.nlm.nih.gov>) at the United States National Library of Medicine. These lists are brief and provide just a few examples. They are not comprehensive. Product formulations also change frequently. Read product labels carefully and talk to your doctor if you have any questions. These are general guidelines. Talk to your doctor for more specific instructions.
