## SS507: Isoamyl-p-methoxycinnamate

### Patient Information

Your patch test result indicates that you have a contact allergy to isoamyl-p-methoxycinnamate. This contact allergy may cause your skin to react when it is exposed to this substance although it may take several days for the symptoms to appear. Typical symptoms include redness, swelling, itching, and fluid-filled blisters.

### Where is isoamyl-p-methoxycinnamate found?

This substance is an ingredient in some sunscreens. It is an absorber of ultraviolet B radiation.

### How can you avoid contact with isoamyl-p-methoxycinnamate?

Avoid products that list any of the following names in the ingredients:

- 2-Benzoic acid, 2-propenoic acid, 3-(4-methoxyphenyl)-3-methylbutyl ester
- 3-(4-Methoxyphenyl)-2-propenoic acid, 3-methylbutyl ester
- 3-10-00-00850 (Beilstein Handbook Reference)
- 3-Methylbutyl 3-(4-methoxyphenyl)-2-propenoate
- 4-Methoxycinnamic acid, isoamyl ester
- AI3-05552
- Amiloxate
- Amiloxate [USAN]
- BRN 3132627
- E 1000
- EINECS 275-702-5
- Isoamyl p-methoxycinnamate
- Neo Heliopan E1000

### What are some products that may contain isoamyl-p-methoxycinnamate?

#### Sunscreen

\*For additional information about products that might contain **isoamyl-p-methoxycinnamate**, go to the Household Product Database online (<http://householdproducts.nlm.nih.gov>) at the United States National Library of Medicine. These lists are brief and provide just a few examples. They are not comprehensive. Product formulations also change frequently. Read product labels carefully and talk to your doctor if you have any questions. These are general guidelines. Talk to your doctor for more specific instructions.
