## CS502: dexamethasone-21-phosphate

**CAS#: 312-93-6**

### Patient Information

Your patch test result indicates that you have a contact allergy to dexamethasone-21-phosphate. This contact allergy may cause your skin to react when it is exposed to this substance although it may take several days for the symptoms to appear. Typical symptoms include redness, swelling, itching, and fluid-filled blisters.

### Where is dexamethasone-21-phosphate found?

This substance is found in anti-inflammatories. It stimulates glutamine uptake in the cerebral cortex.

### How can you avoid contact with dexamethasone-21-phosphate?

Avoid products that list any of the following names in the ingredients:

- Betnelan phosphate
- Dexamethasone 21-orthophosphate
- Dexamethasone 21-phosphate
- Dexamethasone phosphate
- Dexamethasone-21-dihydrogen-phosphate
- Dexamethasone-21-phosphate
- EINECS 206-232-0
- Hexadrol phosphate
- Neodecadron
- Oradexon phosphate
- UNII-2BP70L44PR
- Wymesone

### What are some products that may contain dexamethasone-21-phosphate?

#### Anti-inflammatories

\*For additional information about products that might contain dexamethasone-21-phosphate, go to the Household Product Database online (<http://householdproducts.nlm.nih.gov>) at the United States National Library of Medicine. These lists are brief and provide just a few examples. They are not comprehensive. Product formulations also change frequently. Read product labels carefully and talk to your doctor if you have any questions. These are general guidelines. Talk to your doctor for more specific instructions.
