

DC325: Disperse Orange-3

CAS#: 730-40-5

Patient Information

Your patch test result indicates that you have a contact allergy to disperse orange-3. This contact allergy may cause your skin to react when it is exposed to this substance although it may take several days for the symptoms to appear. Typical symptoms include redness, swelling, itching, and fluid-filled blisters.

Where is disperse orange-3 found?

This is a dye used in coloring fabrics and plastics. It is found in many fibrous materials such as polyester.

How can you avoid contact with disperse orange-3?

Avoid products that list any of the following names in the ingredients:

- EINECS 211-984-8
- Orange 3

What are some products that may contain disperse orange-3?

- Clothing

*For additional information about products that might contain **Disperse orange-3**, go to the Household Product Database online (householdproducts.nlm.nih.gov) at the United States National Library of Medicine. These lists are brief and provide just a few examples. They are not comprehensive. Product formulations also change frequently. Read product labels carefully and talk to your doctor if you have any questions. These are general guidelines. Talk to your doctor for more specific instructions.
