

the art and science of smart patch testing™

LA520: Dibucaine (cinchocaine-HCl) CAS#: 61-12-1

Patient Information

Your patch test result indicates that you have a contact allergy to dibucaine. This contact allergy may cause your skin to react when it is exposed to this substance although it may take several days for the symptoms to appear. Typical symptoms include redness, swelling, itching, and fluid-filled blisters.

Where is dibucaine found?

Dibucaine is an amide local anesthetic. It is the active ingredient in some topical hemorrhoid creams.

How can you avoid contact with dibucaine?

Avoid products that list any of the following names in the ingredients:

- Dibucaine hydrochloride
- C 3225
- Cincaine chloride
- Cincaine hydrochloride
- Cinchocaine hydrochloride
- 2-Butoxy-N-(2-(diethylamino)ethyl)cinchoninamide monohydrochloride
- 2-Butoxy-N-(2-diethylaminoethyl)cinchoninamide hydrochloride
- 2-Butoxy-N-(2-diethylaminoethyl)cinchoninic acid amide hydrochloride
- 4-Quinolinecarboxamide, 2-butoxy-N-(2-(diethylamino)ethyl)-,
- Cinchocainium chloride
- EINECS 200-498-1
- Nupercainal
- Nupercaine hydrochloride
- Cinchocaine hydrochloride monohydrochloride
- Butoxycinchoninic acid diethylethylenediamide hydrochloride
- Cinchoninamide, 2-butoxy-N-(2-(diethylamino)ethyl)-, monohydrochloride
- Benzolin
- Dibucaine hydrochloride
- Nupercaine hydrochloride
- Percaine
- Sovcaine

What are some products that may contain dibucaine?

Antiseptic Wash

Hemorrhoid creams

Local Anesthetics:

- Activ BurnStuff First Aid
- Aloe Vera Spray Gel with Lidocaine
- Antiseptic & Topical Analgesic

- Bactine First Aid Antiseptic/Anesthetic
