## CS496: Hydrocortisone CAS#: 50-23-7

### Patient Information

Your patch test result indicates that you have a contact allergy to hydrocortisone. This contact allergy may cause your skin to react when it is exposed to this substance although it may take several days for the symptoms to appear. Typical symptoms include redness, swelling, itching, and fluid-filled blisters.

### Where is hydrocortisone found?

Hydrocortisone is found in medications used to treat allergies and inflammation.
