

the art and science of smart patch testing™

## **PG315: Bisphenol F**

### **CAS#: 25068-38-6**

### **Patient Information**

Your patch test result indicates that you have a contact allergy to bisphenol F. This contact allergy may cause your skin to react when it is exposed to this substance although it may take several days for the symptoms to appear. Typical symptoms include redness, swelling, itching, and fluid-filled blisters.

#### **Where is bisphenol F found?**

Bisphenol F is an epoxy resin found in varnishes and enamels. It is also found in furniture finishes, printing inks, dental, surgical, and prosthetic applications.

#### **How can you avoid contact with bisphenol F?**

Avoid products that list any of the following names in the ingredients:

- 2,2'-Methylenebis(phenol)
- 2,2'-Methylenediphenol
- Bis(2-hydroxyphenyl)methane
- Bisphenol F
- EINECS 219-578-2
- NSC 402103
- o-(o-Hydroxybenzyl)phenol

#### **What are some products that may contain bisphenol F?**

##### **Hydraulic Fluids**

##### **Plastic Products**

\*For additional information about products that might contain **bisphenol F**, go to the Household Product Database online (<http://householdproducts.nlm.nih.gov>) at the United States National Library of Medicine. These lists are brief and provide just a few examples. They are not comprehensive. Product formulations also change frequently. Read product labels carefully and talk to your doctor if you have any questions. These are general guidelines. Talk to your doctor for more specific instructions.
