

the art and science of smart patch testing™

## DC330: Disperse yellow-9 CAS#: 6373-73-5

### Patient Information

Your patch test result indicates that you have a contact allergy to disperse yellow-9. This contact allergy may cause your skin to react when it is exposed to this substance although it may take several days for the symptoms to appear. Typical symptoms include redness, swelling, itching, and fluid-filled blisters.

### Where is disperse yellow-9 found?

Disperse yellow-9 is a textile dye found in terylene and clothing.

### How can you avoid contact with disperse yellow-9?

Avoid products that list any of the following names in the ingredients:

- 2,4-Dinitro-4'-aminodiphenylamine
- 4-Amino-2',4'-dinitrodiphenylamine
- C.I. 10375
- C.I. Disperse Yellow 9
- C.I. Solvent Orange 53
- EINECS 228-919-4
- NSC 60560
- SRA Golden Yellow IX
- Seriplas Yellow PL
- Serisol Fast Yellow PL
- Supracet Yellow 5RD

### What are some products that may contain disperse yellow-9?

#### Clothing

#### Terylene

\*For additional information about products that might contain **disperse yellow-9**, go to the Household Product Database online (<http://householdproducts.nlm.nih.gov>) at the United States National Library of Medicine. These lists are brief and provide just a few examples. They are not comprehensive. Product formulations also change frequently. Read product labels carefully and talk to your doctor if you have any questions. These are general guidelines. Talk to your doctor for more specific instructions.
