

Glyoxal trimeric dehydrate

CAS#: 4405-13-4

Where is this allergen found?

Glyoxal trimeric dihydrate is used in the paper and textile industry. It is used for paper coatings and as a starch-based formulation and as a starting material for wrinkle-resistant treatments.

How can you avoid contact with this allergen?

Avoid products that list any of the following names in the ingredients:

- 1,2-Ethanedione
- 4-01-00-03625 (Beilstein Handbook Reference)
- AI3-24108
- Aerotex glyoxal 40
- BRN 1732463
- Biformal
- Biformyl
- CCRIS 952
- Diformal
- Diformyl
- EINECS 203-474-9
- Ethanedial
- Glyoxal
- Glyoxylaldehyde
- HSDB 497
- Oxal
- Oxalaldehyde

What are some products that may contain this allergen?

Clothing

Paper products

For additional information about products that might contain this allergen, visit the Consumer Product Information Database (householdproducts.nlm.nih.gov) online at the United States National Library of Medicine. These lists are brief and provide just a few examples. They are not comprehensive. Product formulations also change frequently. Read product labels carefully and talk to your doctor if you have any questions. These are general guidelines. Talk to your doctor for more specific instructions.
