

the art and science of smart patch testing™

CL439: sodium-2-pyridinethiol-1-oxide (Sodium-Omadine) CAS#: 3811-73-2

Patient Information

Your patch test result indicates that you have a contact allergy to sodium-2-pyridinethiol-1-oxide (Sodium-Omadine). This contact allergy may cause your skin to react when it is exposed to this substance although it may take several days for the symptoms to appear. Typical symptoms include redness, swelling, itching, and fluid-filled blisters.

Where is sodium-2-pyridinethiol-1-oxide (Sodium-Omadine)?

Sodium-2-pyridinethiol-1-oxide (Sodium-Omadine) is a bactericide and preservative found in coolants, make-up removers, paints, lubricants, and latex.

How can you avoid contact with sodium-2-pyridinethiol-1-oxide (Sodium-Omadine)?

Avoid products that list any of the following names in the ingredients:

- Sodium Omadine
- Sodium-2-pyridinethiol-1-oxide

What are some products that may contain sodium-2-pyridinethiol-1-oxide (Sodium-Omadine)?

Household Products:

- Cooling fluids
- Paints
- Synthetic fiber lubricants
- Vinyl acetate latex

Liquids:

- Cosmetic rinse-off products

*For additional information about products that might contain **sodium-2-pyridinethiol-1-oxide (Sodium-Omadine)**, go to the Household Product Database online (<http://householdproducts.nlm.nih.gov>) at the United States National Library of Medicine. These lists are brief and provide just a few examples. They are not comprehensive. Product formulations also change frequently. Read product labels carefully and talk to your doctor if you have any questions. These are general guidelines. Talk to your doctor for more specific instructions.
