

the art and science of smart patch testing™

EM411: Pilocarpinhydrochlorid CAS#: 54-71-7

Patient Information

Your patch test result indicates that you have a contact allergy to pilocarpinhydrochlorid. This contact allergy may cause your skin to react when it is exposed to this substance although it may take several days for the symptoms to appear. Typical symptoms include redness, swelling, itching, and fluid-filled blisters.

Where is pilocarpinhydrochlorid found?

This substance is found in products used to treat dry mouth.

How can you avoid contact with pilocarpinhydrochlorid?

Avoid products that list any of the following names in the ingredients:

- 2(3H)-Furanone, 3-ethylidihydro-4-((1-methyl-1H-imidazol-5-yl)methyl)-, monohydrochloride, (3S-cis)-
- A13-61859
- Adsorbocarpine
- Almocarpine
- Ami-pilo
- Amistura P
- EINECS 200-212-5
- Epicar
- Isopto-carpine
- MI-Pilo Ophth Sol
- Mistura P
- NSC 5746
- Pilocar SMP
- Pilocarpal
- Pilocarpine HCl
- Pilocarpine hydrochloride
- Pilocarpine monohydrochloride
- Pilocarpine muriate
- Pilocarpine, hydrochloride
- Pilocel
- Pilokarpin monohydrochloride
- Pilomiotin
- Pilopine HS
- Pilovisc
- Salagen
- Sno pilo
- Spersacarpine hydrochloride
- UNII-0WW6D218XJ

What are some products that may contain pilocarpinhydrochlorid?

Medicaments

*For additional information about products that might contain **pilocarpinhydrochlorid**, go to the Household Product Database online (<http://householdproducts.nlm.nih.gov>) at the United States National Library of Medicine. These lists are brief and provide just a few examples. They are not comprehensive. Product formulations also change frequently. Read product labels carefully and talk to your doctor if you have any questions. These are general guidelines. Talk to your doctor for more specific instructions.
