

Sodium disulfite

CAS#: 7681-57-4

Where is this allergen found?

Sodium disulphite is used as a preservative in some products and may be used as a bleaching agent. It is found in baking ingredients, preserved onion, alcohol, baked goods, fruit juices, potato products, among others.

How can you avoid contact with this allergen?

Avoid products that list any of the following names in the ingredients:

- AI3-51684
- CCRIS 3951
- Campden Tablets
- Disodium disulfite
- Disodium metabisulfite
- Disodium pyrosulfite
- Disulfurous acid, disodium salt
- EINECS 231-673-0
- Fertisilo
- HSDB 378
- Natrii disulfis
- Natrium metabisulfurosum
- Natrium pyrosulfit
- Natriumbisulfit
- Natriummetabisulfit
- Pyrosulfurous acid, disodium salt
- Sodium bisulfite anhydrous
- Sodium disulfite
- Sodium metabisulfite
- Sodium metabisulfite (Na₂-S₂O₅)
- Sodium metabisulphite
- Sodium pyrosulfite
- Sodium pyrosulfite (Na₂S₂O₅)

What are some products that may contain this allergen?

Food Products

For additional information about products that might contain this allergen, visit the Consumer Product Information Database (householdproducts.nlm.nih.gov) online at the United States National Library of Medicine. These lists are brief and provide just a few examples. They are not comprehensive. Product formulations also change frequently. Read product labels carefully and talk to your doctor if you have any questions. These are general guidelines. Talk to your doctor for more specific instructions.
