PG326: Melamine formaldehyde resin

CAS#: 9003-08-1

Patient Information

Your patch test result indicates that you have a contact allergy to melamine formaldehyde resin. This contact allergy may cause your skin to react when it is exposed to this substance although it may take several days for the symptoms to appear. Typical symptoms include redness, swelling, itching, and fluid-filled blisters.

Where is melamine formaldehyde resin found?

This substance can be found in kitchen utensils and plates. It is the main constituent in laminates and laminate flooring. It is also found in ready-to-assemble furniture and inexpensive cabinets.

How can you avoid contact with melamine formaldehyde resin?

Avoid products that list any of the following names in the ingredients:

- Budamin MF 55I
- Budamin MF 60I
- CA 105
- CR 2024
- Cassurit HML
- Cassurit MLP
- Cassurit MLS
- Cassurit MT
- Cibamin M 100
- Cohedur A
- Cymel
- Melamine polymer with formaldehyde
- Melamine, polymer with formaldehyde
